Cluj-Napoca, Romania

Office plan

## The story

The office and showroom of FORMAT4 architects is designed and built by the architects of the team. The choice of +Kouple lamps came naturally, as the design of these lamps meet the values of our office: clean and clear design lines, natural and good quality materials and a strong sense of identity.

Having wood and concrete as the main backdrop, the metallic lighting fixtures come as a stylish detail that completes the overall look and feel. The first lamp that you set your eyes on when you enter the space is the CAP lamp, with its clean and clear design. A circle of indirect light is spotting the group of the three lamps that are hanging at different heights above the table, creating an interesting dialogue and emphasising the table as the central piece of the lounge area.

Four aligned PLATE lamps seem like floating in the meeting area, adding some detail, a point of interest and a bit of colour in an otherwise minimal, wood interior. Last but not least, we chose two different colours for the hanging BLT CAP lamps, showing the gender of each bathroom and adding a focus point for each space.

Thank you
