

Luno | Cafe

The project invites visitors to enjoy coffee in the cozy interior of LUNO — a café in the heart of Chişinău, where every decor element is aimed at creating a positive mood and a unique sense of space. The vibrant orange counter adds warmth, while the mirrored domes fill the space with light and air, serving as the main accent of the interior. The play and combination of elements, such as the light tiles on the walls, enhance the relaxed and comfortable atmosphere, maintaining cleanliness and a minimalist concept.
