Concept - Dis||quiet

Silence is of the essence. We all seek that which we cannot grasp and which constantly eludes us. In the buzz of life, frantic activity is a hallmark of modernity. It is an unavoidable condition of our fate. Perhaps this is why we have grown to appreciate every second of silence and repose. We have designed a play of light that captures the emotionality of music. The light cuts through and across the building, creating a composition that we react to and engage with. We are encouraged to quieten our thoughts and repose our actions. Our daily disquiet is replaced by this quiet.
