

Rogob | Food Market

We are excited to present our latest project, crafted with great care! This is the flagship store and the first self-service restaurant of the renowned meat products brand Rogob, now delighting visitors in a unique new format.

We are proud to share real photos of the completed project, where our design seamlessly combines two key concepts — retail and dining — within a single space.

Our main task was to create a harmonious and functional environment with a single entrance and exit, effectively organizing visitor flow and crafting a comfortable atmosphere. We considered every detail to ensure that each visit to Rogob's store and restaurant is as convenient and enjoyable as possible.
