DESIGN STRATEGIES

SUNLIGHTS & FACADE DESIGN

Sun-shading devices regulate daylight, improve energy efficiency, and give the façade a distinctive architectural character.

PRIVACY & ACOUSTIC COMFORT

A decorative brick double-wall system minimizes external noise, enhances privacy, and enriches the façade with texture and material depth.

SPATIAL CONTINUITY

Large sliding glass doors connect the living space with the landscape, while the reflecting pool and sculpture create a calm and inviting entrance.

PERSONALIZED DESIGN

A glass floor creates a visual connection between the living space and the family's heritage vehicle, making it a unique feature designed specifically for the owner.

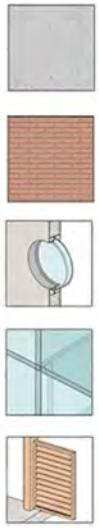
MATERIALS



EXPOSED CONCRETE/ MATERIAL HONESTY

BRICK / WARM TEXTURE

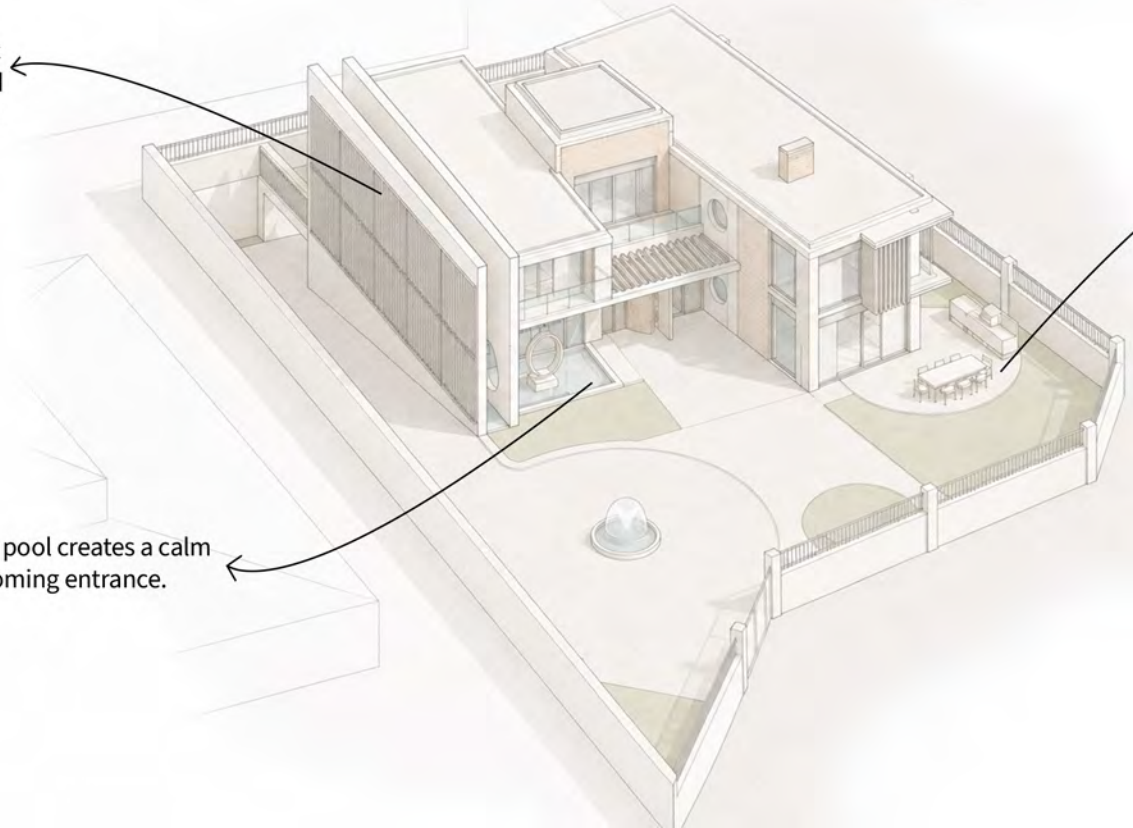
CIRCULAR WINDOW / FRAMED VIEW

GLASS / TRANSPARENCY

WOODEN SUNSHADES / SOLAR SHADING

Full-height glazing along the staircase allows natural light in and creates a visual connection with the courtyard.

The courtyard strengthens the relationship between indoor and outdoor spaces, allowing light and nature to become part of everyday living.



The outer wall acts as an acoustic barrier, while the inner perforated brick screen softens daylight and enhances privacy.

The deck provides a flexible outdoor space for dining, gathering, and relaxation.

The reflecting pool creates a calm and welcoming entrance.
